Through Dedication, the Women's Council Continues to Build Food Security Through Food Processing and Preservation

On July 2, 2026, community outreach activities continued at U Otohi, Awak (Nan Sapwo), where the Youth Group participated in a training on food security, food processing, and food preservation. Facilitated by Mrs. Debra Sohs, the session provided participants with practical skills and knowledge to improve food preservation, reduce food waste, and promote sustainable food practices. Through the continued dedication of the Women's Council and community members, these trainings are helping strengthen food security and build more resilient communities across Pohnpei.

Following the earlier Youth Group session, community outreach activities continued on July 2, 2026, with a second GCF Food Security, Food Processing, and Food Preservation training held at U Awak (Nan Sunoip). Facilitated by Ms. Debra Sohs, the afternoon session equipped participants with practical food processing and preservation skills to strengthen household food security and promote sustainable food practices. The training reflected the continued commitment of the Women's Council and community members to building stronger, more resilient communities.

Through Dedication, the Women's Council Continues to Build Food Security Through Food Processing and Preservation

Community outreach activities also continued on July 2, 2026, with another GCF Food Security, Food Processing, and Food Preservation training conducted in Wone Pahntehlap, Kitti. Facilitated by Mrs. Juleen Pablo Immanuel, the session provided participants with practical knowledge and hands-on skills in food processing and preservation to enhance household food security and promote sustainable food practices. The training reflects the continued commitment of local communities to strengthening resilience through climate-smart food security initiatives.

Community outreach activities continued on July 2, 2026, with another GCF Food Security, Food Processing, and Food Preservation training held at the Kitti Court Room. Facilitated by Mrs. Juleen Pablo Immanuel, the session provided participants with practical knowledge and hands-on techniques in food processing and preservation to improve household food security and encourage sustainable use of local food resources. The training highlighted the ongoing commitment of communities in Kitti to strengthening food security through climate-smart practices.

Pohnpei Women's Council Continues to Empower Communities Through Food Processing and Preservation

Community outreach activities continued on July 4, 2026, with a Food Security, Food Processing, and Food Preservation Demo-Training conducted during the Kolonia Town Senior Citizens Gathering at the Kolonia Town Gym. Facilitated by Mrs. Bernolina Hedson, the session provided practical demonstrations on food processing and preservation techniques that help reduce food waste, improve household food security, and promote the sustainable use of local food resources. By equipping senior citizens with practical skills, the training reinforced their important role in passing on traditional knowledge and building more food-secure and climate-resilient communities.

Community outreach activities continued on July 6, 2026, with a Food Security, Food Processing, and Food Preservation Demo-Training conducted at the PWC Resource Center, Kolonia Nanpepper. Facilitated by Ms. Stephanie Fredrick, Ms. Elnora Tihpen, Ms. Siwister Fretrick, Ms. Lynn Albert, and Ms. Nelsihda Actouka, the session featured hands-on demonstrations that equipped participants with practical food processing and preservation techniques. Through these activities, participants gained valuable skills to reduce food waste, extend the shelf life of local food products, and strengthen household food security through the sustainable use of local resources, further supporting resilient and self-reliant communities.

Food Processing and Preservation Trainings Continue to Reach More Communities

Community outreach activities continued on July 8, 2026, with a Food Processing and Preservation Training conducted for Kolonia Section 1. Facilitated by Mrs. Bernolina Hedson, the session provided participants with practical knowledge and hands-on techniques to reduce food waste, extend the shelf life of locally produced foods, and promote household food security through the sustainable use of local resources. The training reflects the continued commitment to equipping communities with practical skills that support food security and climate resilience.

Community outreach activities continued on July 10, 2026, with a GCF Food Processing and Preservation Training conducted in Nett, Eirke. Facilitated by Mrs. Swihner Sultan, the training introduced participants to practical food processing and preservation techniques that help reduce food waste, extend the shelf life of local food products, and strengthen household food security. Through these hands-on activities, participants gained valuable skills to support sustainable food practices and build more resilient communities.

Kosrae Communities Working Together to Strengthen Food Security

The GCF SAP020 Climate-Resilient Food Security Project conducted a three-day monitoring visit in Kosrae from July 21-23, 2026, engaging with farmers, community leaders, government representatives, and project partners to review progress and strengthen collaboration. The team met with KFA, CRE, and DREA, developed plans for upcoming activities, and visited demonstration sites in Tafunsak, Lelu, Malem, and Utwe to assess readiness and support the continued implementation of food security and climate-resilient agriculture initiatives across the state. The visit highlighted the strong commitment of Kosrae communities and partners to working together toward a more resilient and sustainable food system.

Promoting Food Security at the KAMORALE Expo 2026

On July 22, 2026, the GCF SAP020 Climate-Resilient Food Security Project participated in the KAMORALE Expo in celebration of International Day, engaging with the public and raising awareness about the project's efforts to strengthen food security and promote climate-smart agriculture across the Federated States of Micronesia. Visitors learned about project activities and received Food Security Project T-shirts, brochures, stickers, banana chips, and water bottles as tokens of appreciation. The event provided an opportunity to connect with communities and highlight the importance of resilient and sustainable local food systems.

Yap Farmers Strengthen Climate-Resilient Practices Through IAS and Food Preservation Training

From July 8–10, 2026, the GCF SAP020 Climate-Resilient Food Security Project conducted Invasive Alien Species (IAS) and Food Processing and Preservation trainings for farmer groups at the SBDC Conference Center in Yap. Participants from various community organizations learned about invasive species identification, control methods, safety measures, food processing protocols, and crop preservation techniques. The three-day training strengthened local knowledge and practical skills, supporting farmer groups in adopting and sharing climate-resilient practices within their communities.
